The following questionnaire, although somewhat long and detailed, is an invaluable source of information about you as a unique person. It will allow me to know the Total You, not just you as a collection of symptoms of an illness.

If, for any reason, you object to fill out any or all of it, you may leave that part blank and provide us with the information you feel comfortable sharing.

**PLEASE NOTE:** This is a confidential record of your medical history and will be kept in a locked and secure location. Information contained here will not be released to any person without your authorization.

---

Would you be willing to sign a release to obtain medical records from your previous doctor(s) and hospital(s), if this information would be helpful for your treatment?

This is why we are asking you to understand we cannot take back any medication even when it is still sealed.**

**\*FOR YOUR INFORMATION\***  
**ABOUT THE VISIT**

The Practitioner will have a short look at your questionnaire first to get some medical history and then it will be discussed together. After that, we will combine all findings with an iridology consultation, the Practitioner uses a microscope to get a three dimensional view of the eye to help locate where the problems are coming from originally.

During the visit you will be informed about the findings. The Practitioner will review everything and organize the right combination of herbs & homeopathies in a very exclusive plan prepared just for you. Normally the plan will only last 3-4 weeks, in which your problems generally should be solved, depending on how serious the issues are.

Each suggestion plan is a unique combination for your individual case, do not change it on your own, give part of the product to someone else, or use it later in other cases without talking to the Practitioner first.

After you start your plan you should come in 14 days for a follow-up visit, this includes another Iridology consultation to verify the healing process. We will then evaluate how everything is going and talk about the success of the plan.

### **IRIDOLOGY**

Iridology identifies inherited predispositions that negatively or positively can affect one's health, as the iris shows, which systems of the body are the least and which are the most resilient.

Iridology is a diagnostic tool that helps the Practitioner see certain signs out of the iris, every bodily organ corresponds to a location on the iris, which then makes it possible to find out where the problems are originating.

Iridology is an invaluable tool for prevention; we need to identify our strongest functioning parts of the body, so we can depend upon them to carry us through periods of stress, and to keep the body balanced and in harmony!

**Homeopathy:** is a system of medicine that uses highly diluted doses from the plant, mineral and animal kingdoms to stimulate natural defenses in the body. Homeopathic remedies are based on the theory that "like cures like," and uses remedies that cause symptoms of a certain illness in one who is healthy in order to stimulate the body's natural defenses to heal those same symptoms in one who is ill. The word homeopathy comes from the Greek word 'homeos' meaning similar, and 'pathos' meaning suffering.

**Herbal Medicine:** is the therapeutic use of plants, and is the most ancient form of health care known to humankind. A herb is a plant or plant part valued for its medicinal, savory or aromatic qualities. Herb plants produce and contain a variety of chemical substances that act upon the body. Herbs have been used to treat virtually every disease and condition. The use of herbology ranges from pain relievers, hormone balancers, energizers, sleep aids, stomach soothers, skin soothers, and treatment of everything from allergies to cancer, from depression to hysteria. Herbs are used for both prevention and treatment.

**Homotoxicology:** In homotoxicology, homotoxins are all of those substances, which can cause ill health in humans. They can be introduced from the exterior or originate in the body itself. In Homotoxicology, homeopathically manufactured combination products are designed to work with the body's defense mechanisms and facilitate the body's elimination of toxic substances.
